Today's Presentation

- Agenda:
 - Medicare Updates and What's Trending
 - Combating the Opioid Crisis
 - Preventative Services: Medicare Diabetes Prevention Program (MDPP)
- Objectives:
 - Provide the latest news and updates
 - Stay updated on Medicare changes
 - Take advantage of the various self-service options available to the provider community
 - Explore the Medicare guidelines regarding outpatient services provided to an inpatient at another facility

I N N O V A T I O N I N A C T I O N

Medicare Updates and What's Trending

I N N O V A T I O N I N A C T I O N

National Correct Coding Edits

- Definition:
 - CMS developed NCCI to promote national correct coding methodologies and to control improper coding leading to inappropriate payment
- Purpose:
 - Applies prepayment edits when two services are performed:
 - ✓ By the same physician or provider
 - ✓ For the same beneficiary
 - ✓ On the same date of service
 - Edits are updated quarterly
 - Use modifiers to report special circumstances
- CMS created references to outline:
 - ✓ Column One/Column Two Correct Coding edit files:
 - Outpatient Hospital PTP edits
 - Practitioner PTP edits
- CMS has a step-by-step process on the Medicare National Correct Coding Initiative in the MLN product [How to use NCCI Tools](#)
- [MLN Matters Special Edition Article SE18012 - Reminder on Billing Requirements Implemented for Non-OPPS Providers](#)

I N N O V A T I O N I N A C T I O N

Temporary Moratorium Extended for Suspending Edits W7020 and W7040 for Maryland Waiver Hospital

- CMS issued an extension to the moratorium on the NCCI editing for MD Waiver hospitals from October 1, 2018, through June 30, 2019:
 - This is an extension of the previous 90-day moratorium from October 1, 2018, through December 31, 2018
- Novitas will bypass the W7020 and W7040 edits for claims received from October 1, 2018, through June 30, 2019, until the moratorium has expired:
 - Applies to any claims being resubmitted or appealed that were initially billed and processed from July 1, 2018 through September 30, 2018
- Effective July 1, 2019, claims will be subject to the edits
- [National Correct Coding Initiative \(NCCI\) Edits Apply to OPPS and Non-OPPS Claims](#)

I N N O V A T I O N I N A C T I O N

MAC Satisfaction Indicator (MSI): Evaluate Our Services

- Best way to share you opinions directly with CMS about your experience with us
- Survey results will help us gain valuable insights and determine process improvements
- [JH Provider MSI Survey](#)
- [JL Provider MSI Survey](#)

I N N O V A T I O N I N A C T I O N

Improvements Based on 2018 MSI Feedback

- Created new webpages and redesigned other webpages to improve the overall user experience through easier navigation and access to our most popular features with less clicks:
 - Claims ([JH](#)) ([JL](#))
 - Medical Review ([JH](#)) ([JL](#))
- Developed an icon-based resource center spotlighting our newest tools:
 - Short promotional videos
 - An area dedicated to providers who are new to the Medicare Program
- Added visual enhancements for customers accessing our website via mobile devices
- A simplified design and quick access for customers to register for and attend online and in-person training sessions ([JH](#)) ([JL](#))
- Additional features added to the Novitasphere ([JH](#)) ([JL](#)) portal:
 - Check the status of pending medically reviewed claims
 - View/respond to requests for additional documentation needed to process pending appeal redeterminations
 - Access to the outcome of appeals decisions appeals and key appeals-related documentation such as development letters and redetermination notices
 - Request immediate recoupment requests
 - Submit general inquiry requests
 - Submit CMS-838 Credit Balance reports
 - Utilize enhanced search parameters and several medical review-related tasks
- Enhanced the Interactive Voice Recognition (IVR) self-service tool ([JH](#)) ([JL](#)):
 - Checking claim status by reporting paid claim information first, followed by claim information for pending claims, rejected claims, and finally denied claims
 - Expanded the recorded messages to include all possible denial/rejection scenarios.

I N N O V A T I O N I N A C T I O N

Hardcopy Claim Submissions Including Adjustments and Cancels

- There are certain instances in which hardcopy claim submissions (including adjustments and cancels) may be necessary, for example:
 - 935 adjustments or cancels
 - Tertiary claims ([JH](#)) ([JL](#))
 - MSP claims that providers are trying to cancel (XX8 TOB and primary payer is not Medicare)
 - [Tribal-self funded adjustments](#)
 - ASCA provider ([JH](#)) ([JL](#)):
 - ✓ Must have submitted documentation to either EDI or claims
 - Disaster related: Must provide explanation (i.e. national disaster declared by CMS, Fire or Flood in building and cannot submit claims for multiple days, switching billers and will not be able to submit claims for multiple days, etc.)
- Note: Hardcopy claims will be returned to provider via mail if one of the exceptions listed is not met
- For a hardcopy adjustment or cancel claim:
 - Complete and attach the Hardcopy Adjustment and Cancel Request Form ([JH](#)) ([JL](#))
 - Include detailed remarks indicating the reason
- Electronic adjustment and cancel requests are preferred when appropriate
- Hardcopy Claim Submissions Including Adjustments and Cancels ([JH](#)) ([JL](#))

Combating the Opioid Crisis

I N N O V A T I O N I N A C T I O N

National Response

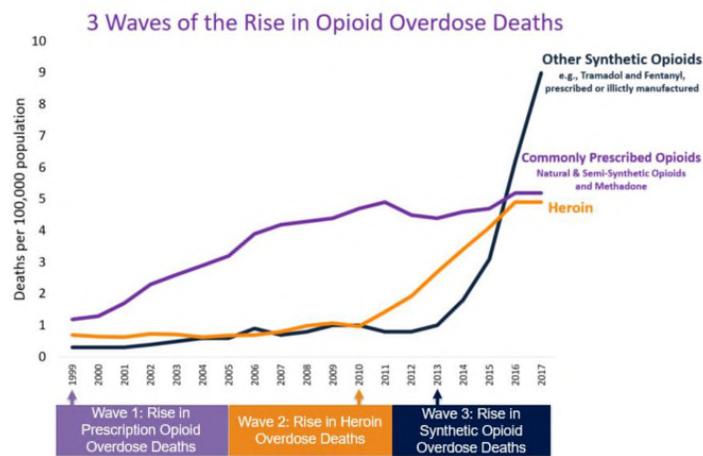

- On Thursday October 26, 2017, President Trump officially declared the opioid crisis a “public health emergency”
- Trump laid out details of how his administration plans to combat the growing crisis – including the promotion of a massive anti-drug ad campaign
- HHS subsequently announced a “[5-Point Strategy To Combat the Opioid Crisis](#)”: Access, Data, Pain, Overdoses, and Research

I N N O V A T I O N I N A C T I O N

The Rise in Opioid Deaths

SOURCE: National Vital Statistics System Mortality File.

I N N O V A T I O N I N A C T I O N

Facts About the Opioid Crisis

- Roughly 21 to 29 percent of patients prescribed opioids for chronic pain misuse them
- Between 8 and 12 percent develop an opioid use disorder
- An estimated 4 to 6 percent who misuse prescription opioids transfer to heroin
- About 80 percent of people who use heroin first misused prescription opioids
- Opioid overdoses increased 30 percent from July 2016, through September 2017, in 52 areas in 45 states
- The Midwestern region observed opioid overdoses increase 70 percent from July 2016, through September 2017
- Opioid overdoses in large cities increased by 54 percent in 16 states

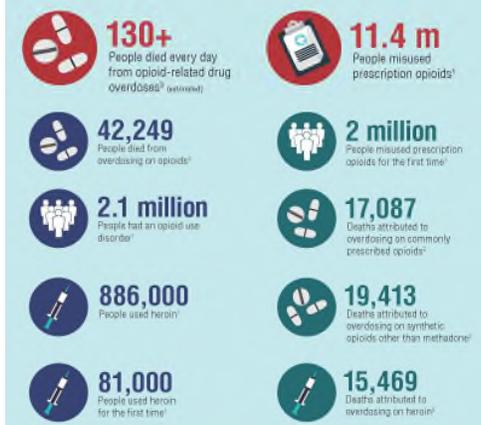

*Source: National Institute on Drug Abuse – [“Opioid Overdose Crisis”](#)

The Scope of the Crisis

THE OPIOID EPIDEMIC BY THE NUMBERS 2016 and 2017 Data

I N N O V A T I O N I N A C T I O N

Reducing Opioid Misuse

- CMS implemented [new opioid policies](#) for Medicare drug plans on January 1, 2019, that include:
 - Improved safety alerts when patients fill opioid prescriptions at the pharmacy
 - Drug management programs for patients at-risk for misuse or abuse of opioids or other drugs:
 - ✓ Providing guidance on [co-prescribing Naloxone](#)
 - Posted new training materials, including slide decks and tip sheets for:
 - ✓ [Prescribers](#)
 - ✓ [Pharmacists](#)
 - ✓ [Patients](#)
- Novitas recently mailed a [letter](#) to all Medicare fee-for-service providers about CMS's work to reduce opioid misuse by people with Medicare

I N N O V A T I O N I N A C T I O N

CMS' Opioid Strategy

- In correlation with HHS' initiative, CMS launched a "3-Pronged Approach", focusing in on:
 - **Prevention:** Manage pain using a safe and effective range of treatment options that rely less on prescription opioids
 - **Treatment:** Expand access to treatment for opioid use disorder
 - **Data:** Use data to target prevention and treatment efforts and to identify fraud and abuse
- Visit the [Reducing Opioid Misuse](#) webpage for more information on CMS' overall strategy

PREVENTION

TREATMENT

DATA

I N N O V A T I O N I N A C T I O N

Opioid Safety Alerts

- Part D plans are expected to implement safety alerts (pharmacy claim edits) for pharmacists to review at the time of dispensing the medication to prevent the unsafe utilization of drugs
- CMS encourages prescribers to respond to pharmacists' outreach in a timely manner and give the appropriate training to on-call prescribers when necessary to resolve opioid safety edits expeditiously and avoid disruption of therapy
- [MLN Matters Special Edition Article SE18016 - A Prescriber's Guide to the New Medicare Part D Opioid Overutilization Policies for 2019](#)

I N N O V A T I O N I N A C T I O N

Safety Alerts and the Prescriber's Role

Opioid Safety Alert	Prescriber's Role
Seven-day supply limit for opioid naïve patients	Patient may receive up to a seven days supply or request a coverage determination for full days supply as written.
Opioid care coordination alert at 90 morphine milligram equivalent (MME)	Regardless of whether individual prescription(s) are written below the threshold, the alert will be triggered by the fill of the prescription that reaches the cumulative threshold of 90 MME or greater.
Concurrent opioid and benzodiazepine use or duplicative long-acting opioid therapy	The pharmacist will conduct additional safety reviews to determine if the patient's opioid use is safe and clinically appropriate. The prescriber may be contacted.
Optional Safety Alert at 200 MME or more	This alert stops the pharmacy from processing the prescription until an override is entered or authorized by the plan.

I N N O V A T I O N I N A C T I O N

Drug Management Programs

- The goal of a DMP is better care coordination for safer use
- Medicare Part D plans may have a DMP that limits access to opioids and benzodiazepines for patients who are considered to be at-risk by the plan for prescription drug abuse
- Potential at-risk patients are identified by their opioid use which involve multiple doctors and pharmacies
- Coverage limitations under a DMP can include requiring the patient to obtain these medications from a specified prescriber and/or pharmacy, or implementing an individualized place of service edit that limits the amount of these medications that will be covered for the patient
- The coverage limitation tools may be put in place for 12 months and extended for an additional 12 months (total of 24 months)

I N N O V A T I O N I N A C T I O N

Opioid Policy Exclusions

- The policies are not “one size fits all”
- Residents of long-term care facilities, those in hospice care, patients receiving palliative or end-of-life care, and patients being treated for active cancer-related pain are exempt from these interventions
- These policies also should not impact patients’ access to MAT, such as buprenorphine

I N N O V A T I O N I N A C T I O N

Review of Opioid Use During the Initial Preventive Physical Exam (IPPE) and Annual Wellness Visit (AWV)

- These preventive benefits are a great way for you to detect illnesses in their earliest stages when treatment works best
- Review of opioid use as an important routine aspect of the patient's medical history (during the IPPE and the first and subsequent AWVs) is helpful in diagnosing and then treating as appropriate OUDs
- Medicare would like to emphasize that review of opioid use is a routine component of this element, including OUD
- If a patient is using opioids, assess the benefit from other, non-opioid pain therapies instead, even if the patient does not have OUD, but is possibly at risk
- [MLN Matters Special Edition Article SE18004 - Review of Opioid Use During the IPPE and AWV](#)

I N N O V A T I O N I N A C T I O N

What Can Be Done? Identify Opportunities for Action

I N N O V A T I O N I N A C T I O N

Health Departments Can

- Alert communities to rapid increases in overdoses observed in EDs for an informed and timely response
- Increase naloxone distribution (an overdose-reversing drug) to first responders, family and friends, and other community members in affected areas, as policies permit
- Increase availability of and access to treatment services, including mental health services and MAT for OUD
- Support programs that reduce harms which can occur when injecting opioids, including those offering screening for HIV and hepatitis B and C, in combination with referral to treatment

I N N O V A T I O N I N A C T I O N

Emergency Departments Can

- Develop post-opioid overdose protocols, which may include:
 - Offering overdose prevention education, naloxone, and related training for patients, family members, and friends
 - Linking patients to treatment and services in the community as needed
 - Starting MAT in the ED

I N N O V A T I O N I N A C T I O N

Healthcare Providers Can

- Prescribe opioids only when benefits are likely to outweigh risks
- Determine a patient's prescription drug history and level of risk by accessing data from their state's Prescription Drug Monitoring Programs
- Identify mental health, social services, and treatment options to provide appropriate care for patients who have OUD

I N N O V A T I O N I N A C T I O N

Everyone Can

- Learn about the [risks of opioids](#)
- Store prescription opioids in a secure place, out of reach of others (including children, family, friends, and visitors)
- Learn about [naloxone](#), its availability, and how to use it
- Contact the [Substance Abuse and Mental Health Services Administration's \(SAMHSA\) National Helpline](#): 1-800-662-HELP for anyone who has trouble with opioid use

Preventative Services: Medicare Diabetes Prevention Program (MDPP)

I N N O V A T I O N I N A C T I O N

Medicare Diabetes Prevention Program (MDPP)

- Definition:
 - The MDPP is defined as an expanded model which includes an evidence-based set of services aimed to help prevent the onset of type 2 diabetes among Medicare beneficiaries with an indication of prediabetes
- Purpose:
 - The primary goal of the expanded model is to help Medicare beneficiaries achieve at least five percent (5%) weight loss
 - Coverage of structured sessions with a coach, using a CDC-approved curriculum to provide training in dietary changes, increased physical activities, and weight loss strategies
- References:
 - Overview of the MDPP [Expanded Model Fact Sheet](#)

 - [Listserv Signup](#)
 - Email questions to: mdpp@cms.hhs.gov

I N N O V A T I O N I N A C T I O N

Payment for MDPP Services

- Organizations who enroll as an MDPP supplier are paid performance-based payments through the CMS claims systems:
 - Medicare payments to suppliers will vary
 - Payments can be up to \$670 per beneficiary over a two year-period, depending on the beneficiary's attendance and weight loss
- In order to submit claims for MDPP services, organizations must:
 - Meet all MDPP supplier requirements and standards, including preliminary or full CDC recognition
 - Have a separate Medicare enrollment as an MDPP supplier
- For the payment structure, HCPCS G-codes, and billing information:
 - [Billing and Claims Fact Sheet](#)
 - [Billing and Payment Quick Reference Guide](#)
 - [MLN Matters Article MM10970 - Updating Calendar Year \(CY\) 2019 Medicare Diabetes Prevention Program \(MDPP\) Payment Rates](#)

I N N O V A T I O N I N A C T I O N

Eligible Beneficiaries

- Eligible beneficiaries are those who:
 - Are enrolled in Medicare Part B
 - Have a body mass index (BMI) of at least 25, or at least 23 if self-identified as Asian
- Meet one of the following three blood test requirements within the 12 months of the first core session:
 - A hemoglobin A1c test with a value between 5.7 and 6.4 percent
 - A fasting plasma glucose of 110-125 mg/dl
 - A 2-hour plasma glucose of 140-199 mg/dl (oral glucose tolerance test)
- Have no previous diagnosis of type 1 or type 2 diabetes (other than gestational diabetes)
- Do not have end-stage renal disease (ESRD)

I N N O V A T I O N I N A C T I O N

Overview of the Benefit

- The first year includes six months of weekly core sessions followed by six months of monthly maintenance sessions
- The second year is contingent upon beneficiary performance and monthly maintenance sessions
- MDPP suppliers must use a CDC-approved curriculum to guide sessions
- Copayment is waived
- No referral is required

I N N O V A T I O N I N A C T I O N

Core Sessions

- Months 0 to 6:
 - MDPP suppliers must offer a minimum of 16 sessions, offered at least one week apart
 - Sessions are available to eligible beneficiaries regardless of weight loss and attendance performance while on the program
 - MDPP suppliers must use a CDC-approved curriculum to guide sessions
 - Five percent weight loss is not required to receive payment
- Months 7-12:
 - MDPP suppliers must offer a minimum of six monthly sessions during the second six months
 - Sessions are available to eligible beneficiaries regardless of weight loss and attendance performance while on the program
 - MDPP suppliers must use a CDC-approved curriculum to guide sessions
 - Payments are made in two three-month intervals
- Months 13-24:
 - MDPP suppliers must offer monthly maintenance sessions
 - Eligible beneficiaries who achieve and maintain weight loss and attendance goals have coverage for three-month intervals of monthly maintenance sessions for up to one year
 - MDPP suppliers must use topics from a CDC-approved curriculum to guide sessions:
 - Payments are made in four three-month intervals and only if the beneficiary attends two ongoing maintenance sessions and achieves five percent weight loss

I N N O V A T I O N I N A C T I O N

MDPP Sessions Journey Map

MDPP Sessions Journey Map

Medicare Diabetes Prevention Program (MDPP)

Sessions Journey Map

MDPP services are structured health behavior change sessions aimed at lowering the risk of type 2 diabetes in Medicare beneficiaries with prediabetes. These sessions promote weight loss through healthy eating and physical activity. This journey map is intended to help MDPP suppliers understand the different session types, session sequencing, and important information to keep in mind when furnishing sessions.

Core Sessions (Months 0-6)

- 16-session period of sessions
- Suppliers must offer at least 16 sessions no more than once per week

Core Maintenance Sessions (Months 7-12)

- 6-month period of sessions, split into two 3-month intervals (months 7-9 and 10-12)
- Suppliers must offer a minimum of 6 sessions, with at least one core maintenance session per month

Ongoing Maintenance Sessions (Months 13-24)

- 12-month period of sessions, split into two 6-month intervals (months 13-18, 19-24, and 25-30)
- Suppliers must offer at least 1 session per month to eligible beneficiaries, in those that have met the 5% weight loss goal
- Beneficiaries must attend 2 sessions (at least 1 in-person and 1 virtual) 5% weight loss during same interval to go onto the next interval

Requirements for All MDPP Sessions

- All sessions must be approximately 2 hour in length
- All sessions must follow a CDC-approved curriculum
- All weight measurements must be taken in-person at a session to count toward performance goals

WHAT IF A BENEFICIARY MISSES A SESSION?

Suppliers may offer make-up sessions (in-person or virtually) to any beneficiary who missed a regularly scheduled session. A make-up session must address the same topic as the regularly scheduled session. Any other make-up sessions must follow the CDC's CDPP standards. Suppliers are **NOT** required to offer make-up sessions.

For all make-up sessions, suppliers may offer:

- A maximum of 2 make-up sessions per week
- A maximum of 1 make-up session on the same day as the regularly scheduled session

For virtual make-up sessions, suppliers may offer:

- A maximum of 4 sessions during the first 12 months, of which no more than 2 may be during core maintenance sessions
- A maximum of 3 sessions during ongoing maintenance sessions

ACTIVITIES BEFORE A SESSION	ACTIVITIES DURING A SESSION	ACTIVITIES AFTER A SESSION
<ul style="list-style-type: none"> • For each interval MDPP beneficiary <ul style="list-style-type: none"> • Determine whether facility receives Medicare Part B coverage • Ask the Plan Services (POS) Medicare or Medicare Advantage (MA) • Determine beneficiary eligibility • Clinical records information through the List of MDPP services before the first core session 	<ul style="list-style-type: none"> • Follow MDPP reimbursement requirements for each session • Collect session level data consistent with CDC CDPP standards (including session start data for ongoing maintenance sessions as required by CMS) • If applicable, inquire if beneficiary engagement items provided to beneficiaries 	<ul style="list-style-type: none"> • Submit claims to the Medicare Administrative Contractors for POS Medicare beneficiaries when a performance goal is met or there is an eligible bridge element • Submit encounter data to the MA plan for MA beneficiaries for payment • Monitor CMS/CDC beneficiary identifier crosswalk for quarterly submission to CMS

Medicare Diabetes Prevention Program (MDPP) Enrollment

- To enroll as an MDPP supplier, organizations must:
 - Have MDPP preliminary recognition or full CDC DPRP recognition
 - Have an active and valid tax-identification number (TIN) or national provider identifier (NPI)
 - Pass enrollment screening at the high categorical risk level
 - Submit a list of MDPP coaches on the MDPP enrollment application who will lead sessions, including full name, date of birth, social security number (SSN), and active and valid NPI and coach eligibility end date (if applicable)
 - Meet MDPP supplier standards and requirements, and other requirements of existing Medicare providers or suppliers
 - Once enrolled, revalidate enrollment every five years
- Complete the [CMS20134](#) Application
- MDPP Enrollment and Recognition Information:
 - [Preparing to Enroll as an MDPP Supplier](#)
 - [Enrollment Checklist](#)
